(5<u>4) Title:</u> A METHOD FOR PROV**ID**ING A COMMUNICATIONS NETWORK SUBSCRIBER WITH AN ANONYMOUS TEMPORARY SUBSCRIBER IDENTITY AND A DUAL ANONYMOUS COMMUNICATION SYSTEM

(57) Abstract: The present invention describes a communications network based method for providing a communications network subscriber using SIP signalling for communication path set up with an anonymous temporary identity and a dual anonymous communication system. In the solution according to the present invention a subscriber can reserve a temporary subscriber identity or even several temporary subscriber identities. The temporary subscriber identity will be associated to the person's real phone number in the application server that handles dual anonymous communication in the communications network.
